SCHOLARS

- **Purpose:**
 - The Sloan Research Fellowship Program recognizes and rewards outstanding early-career faculty who have the potential to revolutionize their fields of study. Successful candidates for a Fellowship generally have a strong record of significant independent research accomplishments that demonstrate creativity and the potential to become future leaders in the scientific community. Nominated candidates are normally several years past the completion of their Ph.D. in order to accumulate a competitive record of independent, significant research.
 - In keeping with the Alfred P. Sloan Foundation's longstanding support of underrepresented scholars in the sciences, the Foundation strongly encourages the nomination of qualified Black, Latinx, Native American, Alaska Native and women candidates.
- **Eligibility:**
 - Hold a Ph.D. or equivalent in chemistry, computer science, Earth system science, economics, mathematics, neuroscience, physics, or a related field
 - Be members of the faculty of a college, university, or other degree-granting institution in the U.S. or Canada
