

**Ain't No Cure
for the Summertime
Blues ... or is there?**

Each year hundreds of innovative, high-scoring research applications go unfunded.

OnPAR provides an opportunity to match your highly meritorious, but unfunded, application with a growing list of private biomedical foundations, pharmaceutical and biotech companies for potential award (such as the Juvenile Diabetes Research Foundation or the Breast Cancer Research Foundation)

Provide just the original short abstract and NIH review evaluations for consideration. Note OnPAR also seeks to give second life to excellent proposals to NSF, CDMRP, CDC, FDA, and HHMI, among others.
